Sneaky Fraction/Calculator Instructions

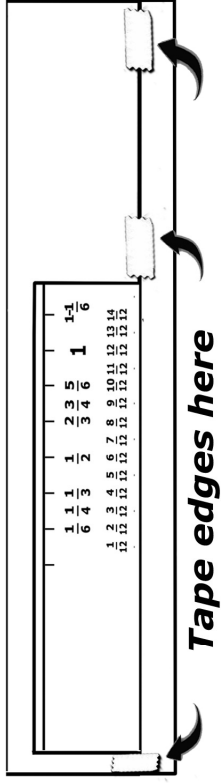

What you need:

- * **scissors**
- * **transparent tape**
- * **1 Post-It Note**

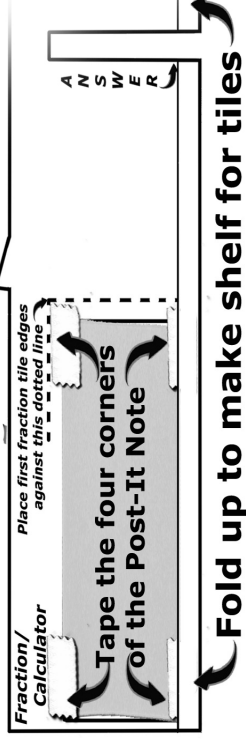

1) Cut out the fraction tiles and the Sneaky Cat cover and slider:

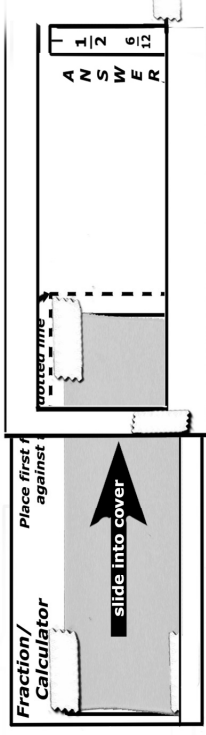

2) Fold the top of the cover down and the bottom up along the designated lines and then tape together as shown below:

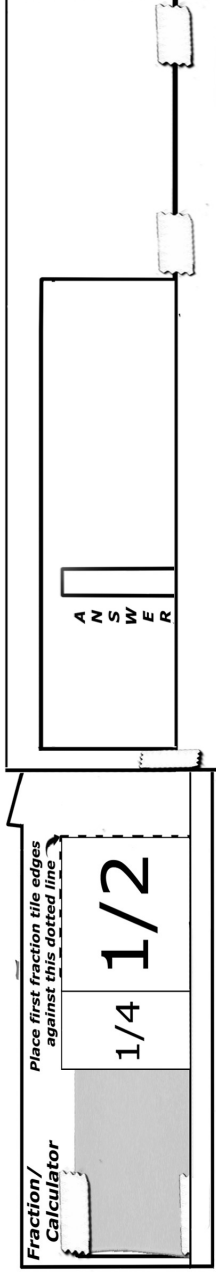

3) Cut the Post-It® Note to fit the area shown on the slider and affix it with tape, STICKY SIDE UP, then fold the bottom of the slider up to make a shelf for the fraction tiles:

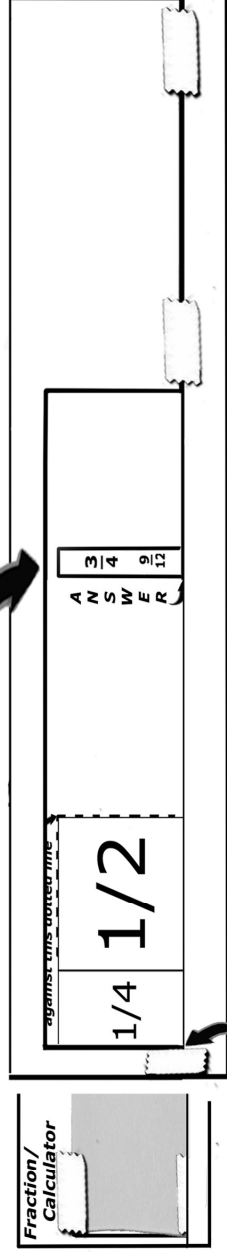

Fold up to make shelf for tiles

5) To use, place the fraction tiles on the slider. Align the first tile with the dotted lines as shown below and then add additional tiles to the left, placing them edge-to-edge as shown. The Post-It® note keeps the tiles in place for you:

6) Now push the slider to the right until the left edge of the last tile is against the left edge of the cover window. The sum of the tiles you chose appears in the ANSWER window! Have fun!

Left edge of last tile aligned with edge of cover window here
